Getting Started

Congratulations for securing a Copy of Forex **Profit Magic Trade Alert Software**.

Whereas trading Forex can be very lucrative, it also carries with it a substantial amount of risk. It's therefore important that there is no form of inattention or negligence whatsoever.

Please keep bear the following in mind:

1. **Journaling** – Research shows that keeping poor records and having no clear goals is the number reason why small businesses fail before they reach three years. Traders who don't take their trading seriously as if it were a business do fail in their first 24 months. The Secret/ magic of succeeding in Forex are doing well in the small things that majority of traders overlook. One of these things is Journaling. Keep tab of your system expectations and daily/ periodical performance is key in succeeding in your trading efforts. I can't dictate how you keep your records, whether it's a scrap book or an online excel sheet, you have to decide for yourself so that you can also take responsibility. ACTION: Decide how you'll be keeping tab of your trading activities whether through excel, a black book or a small notebook; until you start writing down your experience in trading.. then you haven't started trading yet!
2. **Set Goals** – Why do you want to start trading or why do you trade? To pass time? To make a money? Self employment? Part time? Just trying out? – If you don't have a vision in your trading there is no way you can set substantial goals. You need to decide why you want to trade. If you trade to triple your account in a month, then you've failed even before you start your trading. There are two driving factors that should influence how you set your goals: Capital Growth and Profits. If you start with a \$250 account then it would be **unreasonable** to say you have a goal to earn a weekly income from your account. Your goal for a small account should therefore be on capital growth before you can start cashing out. ACTION: Based on your available trading funds set goals and system expectancy, set goals of where you want to be in 6 months or 1 year, then break down to what you have to achieve every month and what you need to do every week/ daily to achieve that target.

3. **Consistency** - Successful people have one thing in common: They have a certain way of doing what they do to get what they get. There is a saying 'constant water dripping on a stone will eventually make it hollow. It's not the big gains that make your trading profitable, but it's the average small profits that pile up CONSISTENTLY resulting to huge gains which result to income or increased capital growth. ACTION: Determine how much time you have in a week, (Monday to Friday) that you can dedicate in your trading: see if you can manage to have some time for all 5 days or 3 days or 1 day. For example, I can trade 3 days a week, minimum 1 hour and a maximum of 4 hours in one session/ two session (please don't copy my example – create yours so that it can fit your UNIQUE situation and that way you can take responsibility of the routine you create).
4. **Discipline** – As an adult, the definition of discipline is doing EXACTLY what you've set yourself to do, no matter the circumstances. And when you are not in a position to fulfill then you put it on record that missed to do a task because of abcd.. There is power in recording your failure and inadequacies because it's a promise to your inner self that you'll do better when you have another chance. ACTION: Based on what we've discussed above, decide how you'll be journaling, what goals you want to achieve, what trading routine you want to follow. Then be disciplined to do EXACTLY what you've set yourself to do.
5. **Celebrate** – Sometimes trading can be a lonely affair. In most cases you'll discover your significant others have the least interest in trading. Getting someone who understands your trading challenges and what it means to overcome them can be very supportive and contribute much to your success in trading. ACTION: Identify a trader in your level (not a guru/ mentor). I know there is a saying that that two blind people can lead each other as they will fall into a pit. But on the contrary, someone who has the same challenges as you is the best person to celebrate small successes that would otherwise not matter to a GURU. If you have no trading friend then find a way to celebrate i.e. even taking a break from your computer and taking a cold drink from the fridge can be a way to celebrate your baby steps in trading. Trading is not just about making money, as you've seen in the last four points.

In concluding, I want to aver that I can't tell you how trade and achieve your goals, but **with Forex Profit Magic** you can achieve your goals much faster and remain a trader for longer ☺ (I had to throw that in, as majority of traders have a trading span shorter than a *Hollywood Marriage*).

Metatrader and Forex Broker(s)

Forex Profit Magic Software only works with Forex Brokers that use MetaTrader (MT4) as their trading platform.

The Forex Profit Magic team has extensively tested Forex Profit Magic with **two forex brokers** and its works just fine. Whereas brokers may be using the same platform they differ in many other ways, like how they deliver price feed, if they accept short span trade's e.t.c. Here are the brokers that we've worked with and we recommend that you open an account with them.

Forex Profit Magic

If you already have an MT4 broker, that's fine. But as far as we are concerned we believe new ideas deserve freshness. Start on a clean slate and take responsibility in your trading going forward.

If you need help installing Metatrader Contact the support department from respective broker. You however, need to have installed Metatrader before you can Install Forex Profit Magic Trade Alert Software.

Installing Forex Profit Magic Trade Alert software

Forex Profit Magic comes in two SEPARATE Trading systems

1. FPM_Swing.exe (for Swing Traders)
2. FPM_Scalper.exe (for Scalping Traders)

As discussed in the getting started section above, we cannot dictate what system is suitable for you, as Forex Profit Magic was designed to Suit a traders unique Situation.

Swing Trading is a trading methodology that attempts to capture gains in a currency pair within 1 to 4 days. This means that a trader can take fewer trades in a week and yet make substantial gains.

Scalping is a trading methodology that seeks to capture small price movements which results to many trades in a day to accumulate substantial profit.

To decide what trader you want to be depends on a number of factors, the main one being the amount of time you have dedicated to trading and more importantly the amount of trading capital available.

Here are the results of how Forex Profit Magic Swing and Scalping Systems performed in various accounts in an a period of six months

System	\$250 Account	\$1,000 Account	\$10,000 Account
FPM Swing	590.37	2,344.72	24,374.19
FPM Scalper	1,413.70	5,637.34	48,442.22

KEY: The figures in blue are the result of each account under a specific FPM system in 6 months. You can view the statements [here](#)

IMPORTANT: You MAY NOT use the two systems (FPM Swing and FPM Scalper) on the same trading account. If you must use the two systems then please open two trading accounts and dedicate each system to a particular account. Again you may NOT interchange the systems in the same account.

Forex Profit Magic

NB: If you break any of the rules duly noted **IMPORTANT**, well the earth will not swallow you but remember you cannot manage what you cannot measure. So make sure you have a CONSISTENT history of each system in a dedicated trading account.

REMEMBER: You can always have More than one MetaTrader installed but must be from different brokers for it to run simultaneously.

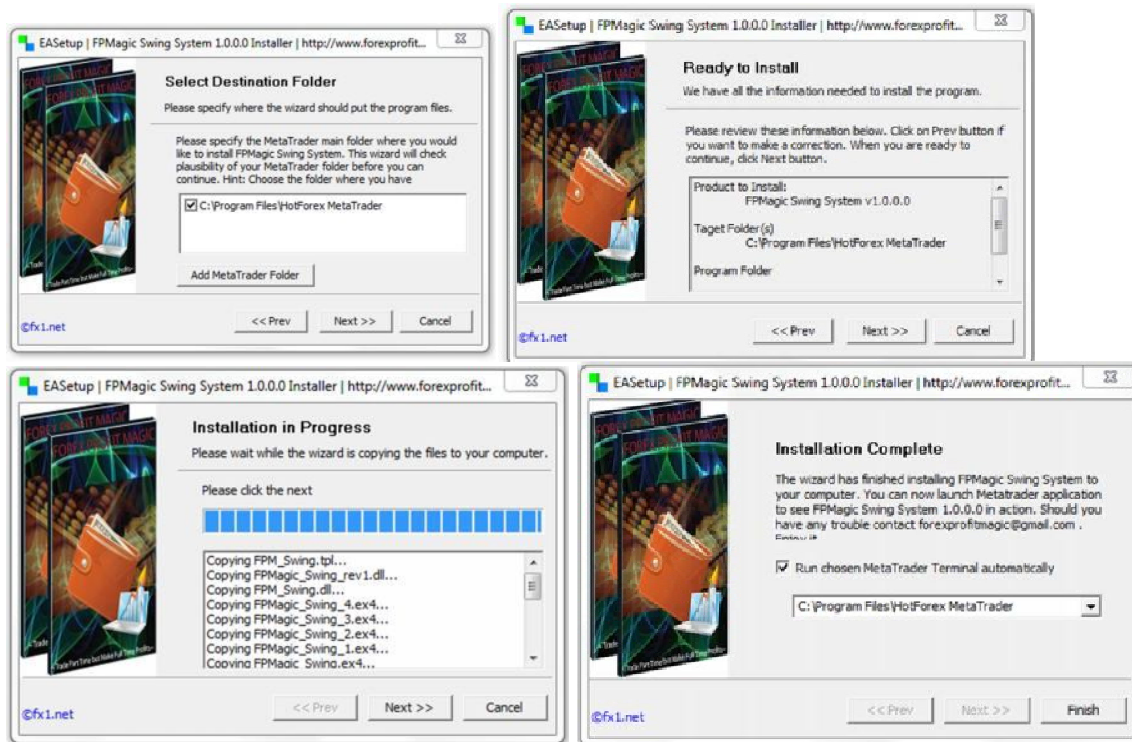

Set up Instructions

Once you've decided which trader you want to be, then install either FPM Swing or FPM Scalper.

Make sure that no metatrader is running .Click on the installation file – A popup screen will follow

Forex Profit Magic

Here instruction for manual install:

1) Copy ex4 files from folder "indicators " into your C:\Program Files\MetaTrader 4\experts\indicators folder

- ex4 files from folder *experts* " into your C:\Program Files\MetaTrader 4\experts\ folder
- .tpl files into C:\Program Files\MetaTrader 4\experts\templates folder

- 2) Close your MetaTrader application (assuming it's currently open ... Ignore this if the application hasn't been launched)
- 3) Launch your MetaTrader application
- 4) Right click on chart
- 5) Open TPL file

DONE

When all indicators turn blue we BUY.. when any of the four indicators change color we exit the trade

When all indicators turn Red we SELL.. When any of the four indicators change color we exit the trade.

- ⇒ **Entry signals is marked by Arrow (Red/Blue)**
- ⇒ **Exit Signal is achieved either by take profit levels or a change in color of any of the four indicators contrary to the colors of the entry signals.**

I'll repeat

When all indicators turn blue we BUY.. when any of the four indicators change color we exit the trade

When all indicators turn Red we SELL.. When any of the four indicators change color we exit the trade.

- ⇒ **Entry signals is marked by Arrow (Red/Blue)**
- ⇒ **Exit Signal is achieved either by take profit levels or a change in color of any of the four indicators contrary to the colors of the entry signals.**

IMPORTANT: If you master the instructions on this particular page then using Forex Profit Magic trade Alert Software will be as easy as Child play and it will generate profitable signals for you like clockwork!

Money management

Forex Profit Magic has an inbuilt money management to protect your trading account. So you don't have to worry about lot size and risk management. We have that taken care of.

So how does Forex Profit magic Money management algorithm work?

1. FPM detects your account balance and automatically determines the suitable lot size for given account
2. FPM Detects the number of open trades and puts a cap on maximum number of open trades
3. FPM detects the available equity and determines if a signal should result to a trade.
4. FPM detects a maximum number of serial losers or serial winners and adjusts lotsize automatically.
5. FPM detects a Trend and opens series of trades to ride the trend. As a result FPM magically turns a 30 pips movement into a 105 Pips Gain!

We strongly recommend that you operate a demo account before trading with real money. This will help you become familiar with the way Forex Profit Magic operates before you commit genuine funds to a real money account.

Best,

Alexander Hamilton & Forex Profit Magic Team
